# GX-3016

Made in France

- **Up to 16 zones**
- **Integrated 3-tone chime**
- **Power supply over Bus**
- **Easy and quick installation**
- **Inconspicuous and multipurpose**

The **GX-3016** is a 16 zones paging microphone console. Carefully studied and designed by our engineers, the **GX-3016** works on a bus architecture, ensuring RS485 communication, power supply distribution and share of a same audio channel.

Connection of consoles is therefore made from one console to the other one, without having to go through the central element. Provided with an electret microphone, 16 programmable keys, 4 function keys and 1 chime, this console meets all your needs in Public Address.

Either put on a table or flush-mounted, this console can be used in several application types.
