

-  **1 direction**
-  **Electret microphone**
-  **Battery (R6) power supply**
-  **Easy and quick use**

The **GM-1051** is a unidirectional electret-type microphone console for public address. It is fitted with a push-button and delivers priority remote control. Having its own power supply (R6 battery delivered), it is used with preamplifiers unable to deliver a phantom power supply. Very easy of use, this console will enable you to meet all your needs for message broadcasting in all-call.
