

GM-2800

Sources

Wireless microphone

- Excellent sound reproduction
- 16 frequencies
- Identification rings
- Carrying case

The **GM-2800** is a wireless hand microphone. It has to be used with diversity GZ2802 receiver in frequency modulation band UHF 744 – 764 MHz. The microphone is delivered with its carrying case and two interchangeable identification rings.

Its acoustic performances ensure constant reproduction quality and warm sound. This microphone is used in any place demanding great freedom of movement and excellent intelligibility.

Features

UHF band	16 frequencies	744-764MHz
Frequency band		50 Hz – 16 Khz
Stability		0,005%
Self operation		8h to 10h
Power supply	2 batteries 1,5V LR6 AA	Consumption 100mA
Dimensions		Ø57 x 245 mm
Color		Anthracite grey
Material		Metal-Plastic
Weight		0,280 Kg

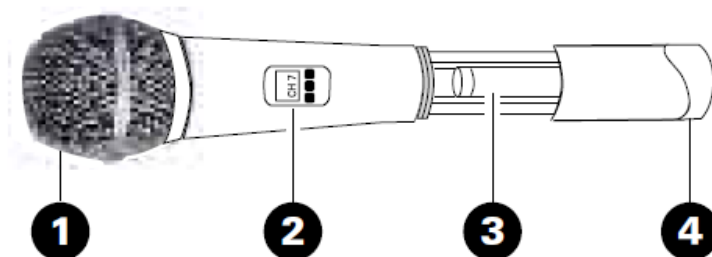

Applications

Speech.....

- Shops (animations)
- Theatres, Entertainment
- Exhibitions / Fairs
- Sports rooms
- Conferences
