

Made in
France

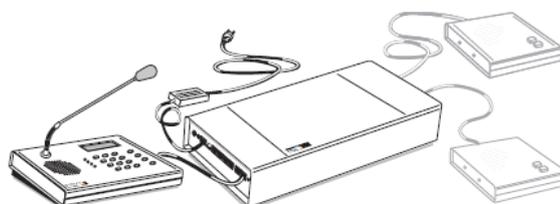

- Master station
- Gooseneck-mounted microphone
- Keypad
- LCD screen
- Bus RJ45 connection

The **GX-2020** is an intercommunication master station to be associated with IZ-2020. It allows to see and manage calls from remote stations (up to 80) as well as to configure central units for music broadcasting and line monitoring. Its LCD screen displays the call queue and the keypad merely enables to select the remote station.
