

GXIP-2600

Sources over IP Microphone console over IP

Made in
France

VoIP

- 🌀 Electret microphone
- 🌀 Full IP
- 🌀 Indications according to **EN54**
- 🌀 For flush-mounting
- 🌀 Easy to use

The **GXIP-2600** is a control console for IP network sound system, (see overleaf).

Integrating a **complete IP** network interface (*audio streaming* and *control-driving*), it enables control of several distributed IP matrix units. It is fitted with 5 function keys as general call, or evacuation starting, with 18 zones keys associated to 2 status LEDs, indicating availability and fault status. It is compliant with the EN54 requests. Being provided with an electret microphone and a pre-announcement chime, you can also broadcast spoken messages to the preselected zones over the network.

Thanks to its design and ergonomics, you can integrate it in any environment either put on a table or flush-mounted.

Features

Audio output	IP Streaming	0dBm / bal.
Mic.	Electret	Gooseneck-mounted
IHM	18 selection keys	5 function keys
Network connection	100/10 BASE T	RJ 45- CAT5
Power supply	24 VDC	700mA min
Dimensions		230x230x70mm
Color		Grey
Material		Metal
Weight		2,5Kg
