

-  **Full IP**
-  **Indications according to *EN54***
-  **For flush-mounting**
-  **Customization**
-  **Easy use**

The **GXIP-2642** is a control console for IP network sound system (see overleaf).

Integrating a complete IP network interface (*audio streaming and control-driving*), it enables control of several distributed IP matrix units.

With its 42 « led-key » sets, this is the solution for customizing the console according to your operator interface requirements : quantity, display, labeling, set of icons. Thanks to its design and ergonomics, you can integrate it in any environment either put on a table or flush-mounted.

Features

Audio output	Balanced on transformer	0dBu
Microphone	Cardioïd	Monitored
Keyboard	Upon demand	Up to 42 keys
Network connection	IP	RJ 45
Power supply	24 VDC	Cons. : 300mA min
Dimensions		330x200x70mm
Color	Lexan - upon demand	Grey
Materials		Metal
Weight		3Kg

Applications

Voice Alarm.....

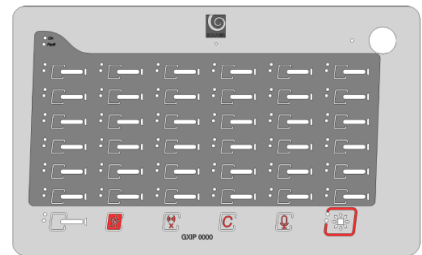

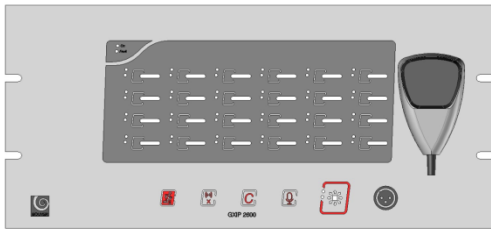

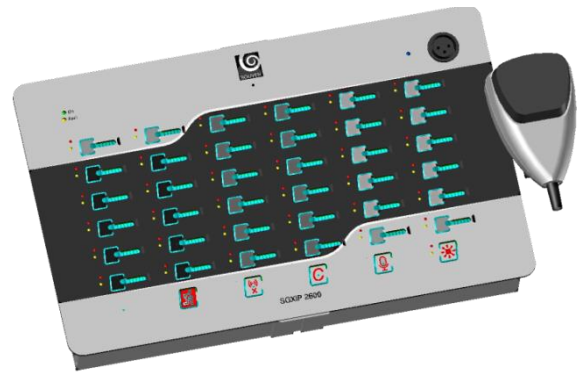

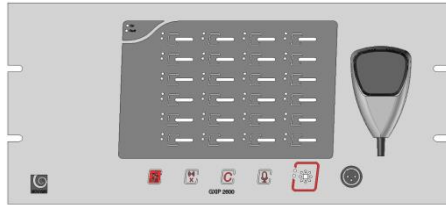

Public Address.....

-  **Checkpoint**
-  **Meeting point**
-  **Information desk**
-  **Office**
