

-  **Small and light**
-  **Headband adjustment**
-  **Pads for comfort**
-  **Great cable length**

The **IL-201** is an induction loop receiver headset.

Small but powerful, it reinforces sound level for someone requesting hearing aid ; it also makes easy inconspicuous listening of an interpreter during guided visits for instance.

The jack allows direct connection to receiver IL-200. Cable length is great enough to get free movements of the user.
