

PC-3112

Intercommunication Master station

Made in
France

- High efficiency - class D
- High acoustic quality
- Locked microphone jack
- 12 directions + All-call

The **PC-3112** is a high power intercom unit. It is intended for industrial applications and noisy areas for which the provided hand palm microphone is perfectly adapted.

This new generation BOUYER intercom with increased performances is provided with a high efficiency Class D amplifier and a built-in loudspeaker having better sound reproduction.

It is compatible with any previous BOUYER remote station and has the same dimensions for flush-mounting (reduced depth).
