

RB-2036-NW

Loudspeaker Sound projector

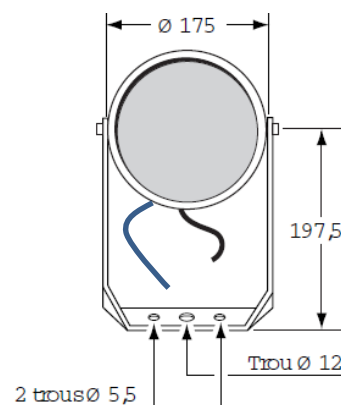

Made in
France

- IP ready
- High acoustic quality
- High intelligibility
- Protection degree IP 55
- Easy installation

The **RB-2036-NW** is a standalone network sound broadcaster.

With an embedded amplifier and a network module, it is a totally IP device, to play sound carried on a computer network. Thanks to a high - 17cm speaker, combined with a tweeter placed on the axis, it provides high quality comfort broadcasting. Its waterproof connectors, and its 2m power cable ensures easy and reliable installation. It is particularly suitable to connect an isolated and distant zone from the main sound issue.
