

Made in  
France

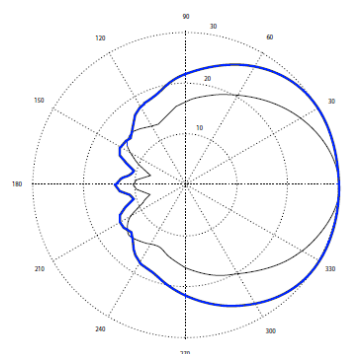

-  **Exceptional coverage**
-  **Noteworthy directivity**
-  **High intelligibility**
-  **Unique design**
-  **Easy and quick installation**

The **RC-Class-08** is an aluminium « column » sound broadcaster. Its ellipsoid geometry, carefully studied by our engineers, enables to reduce diffraction phenomena and to homogenize acoustic radiation.

With **RC-Class-08**, you benefit from a very wide coverage of the audience area over the whole frequency band while maintaining the column effect in the vertical plane. You therefore optimize the sound surface while minimizing the quantity of broadcasters.

With its unique design, associated with its acoustical performances and its exceptional intelligibility, it can be used any environment and ensures a reliable installation.

### Features

Loudspeaker	8 x 3"	tropicalized
Powers		30 - 15 - 8 - 4W
Frequency band	-3dB	150Hz - 18KHz
SPL		88,5 dBA/1W/1m
Directivity -6dB	4000Hz 150° x 20°	500Hz 230° x 70°
Dimensions	Oval section	139 x 160 x 1118mm
Color	White Aluminium	RAL 9006
Material	Metal grid	Aluminium
Weight		9 Kg

### Applications

- Music**..... 
- Speech**..... 
- Color customization** ..... 
- Outdoors ( W version )** ..... 

-  **Exhibitions centres**
-  **Places of worship**
-  **Conference rooms**

Available in outdoor design : RC-class08W : IP65
