

TA-4102

IP matrix module IP matrix module

-  Full IP – SIP integrated
-  Low latency < 50 ms
-  Great flexibility and evolution
-  Multicast management of audio

channels

The matrix module **TA-4102** (rack-mounting unit) enables to get a public address system through IP network. Eight configurable flows (input and/or output) can be managed. It is also featured with 4 GPI and 4 GPO.

The **TA-4102** is a converter of analog lines into digital lines. It guarantees transmission of audio signal without compression distortion.

This is the solution for your large-scale applications requiring high quality broadcasting and architectural evolution, whether for public address or voice alarm

Features

Inputs	0 to 8
Outputs	0 to 8
Bandwidth	20 Hz – 20 kHz
GPI / GPO	4 + 4
Protocols	RTP SIP
Supported audio codecs	G711 PCM SPEEX OPUS MP3
Ethernet	10/100 Base T(X)
Dimensions	483 x 155 x 44 mm
Material	Aluminium

Applications

- Public address system**..... 
- Voice alarm**..... 

-  Airport terminals
-  Railway stations
-  Industries
-  Education buildings
-  Health buildings
-  Supermarkets
-  Entertainment rooms
