More details

Vulca Voice is a range of compact EN54-certified Voice Alarm Control and Indicating Equipment.

Integrated SD memory card associated with digital player makes it possible to easily customize your messages and create different programs. Thanks to its IP communication protocol, it can directly communicate with a network controler such as a distant IP console.

Implementation is optimized thanks to full equipment integration (amplifiers, power supply and batteries) and adapted interfaces.

(1) Batteries are not included
