Easy to install

Compatible 19" rack
Space saving (2U)

24V input / Compatible
backup power supply
Multipurpose

More details

AZ-24 ventilation drawer is ideal to optimize cooling of your racked sound system while ensuring a very limited noise level (<50 dB at 1m on the front part). Its installation is made easier with its 2 points input (working on 24V) and it is compatible with any type of sound systems for background music or safety (requesting a backup power supply working in continuous even in case of outage).

FEATURES

Input	2 points polarized connector
