

### Key points

-  Weatherproof and durable
-  Optimal audio quality
-  Multipurpose, compact size
-  Easy adjustable power

**Optimal audio quality**  
Made of 4 speakers (3") + 1 tweeter

**Weatherproof and durable**  
IP66 level and aluminum body

**Multipurpose**  
Controlled sound coverage +  
adjustable orientation

**Easy adjustable power**  
Accessible powertap

### More information

This aluminum column is a 2 way system composed of 4 drivers (3") and one tweeter which guarantees an optimal sound quality for both background music and vocals (speech, singing...). Its metal body and its IP66 level allows it to be installed both indoor and outdoor. Its controlled sound coverage makes it the best fit for the hardest spaces to cover with a sound system.
