"Hearing-impaired" panel
Integrated loop = no installation

Microphone
Clear sound

Ultra-compact amplifier
Invisible installation
(fixed on the back of the panel)

Mains power supply

More details

This induction loop kit enables to equip reception desk or counter. It also enables to meet equal opportunity standards and to respect IEC-60118-4 standard requirements. Its induction loop is directly integrated in an "hearing-impaired" panel for convenient installation. It is designed to offer access to people with a hearing device including "T" switch.

The kit can be placed directly on a desk or counter. Its amplifier is equipped with two inputs, parameters and LED indicating power + loop status. It also integrates an audio processor to avoid not desired and important sound level variations.

FEATURES

Power supply	12V DC / 1,5A (mains)
