

Key points

Acoustic & visual solution

360° sound

Customizable grid

Easy integration

SmartSound-360 includes a 100V transformer in its wall mounting base, which facilitates its installation

360° sound

Sound spreads at 360° thanks to the two-way structure of SmartSound-360, allowing you to reach your entire audience

Innovations

The sound is produced by a mylar membrane of a few micrometers which vibrates thanks to the magnetic field produced by conductive aluminum tapes

Unique design

Thanks to its ultra-thin membrane technology, SmartSound-360 offers a clean and elegant design that fits discreetly in any environment

More details

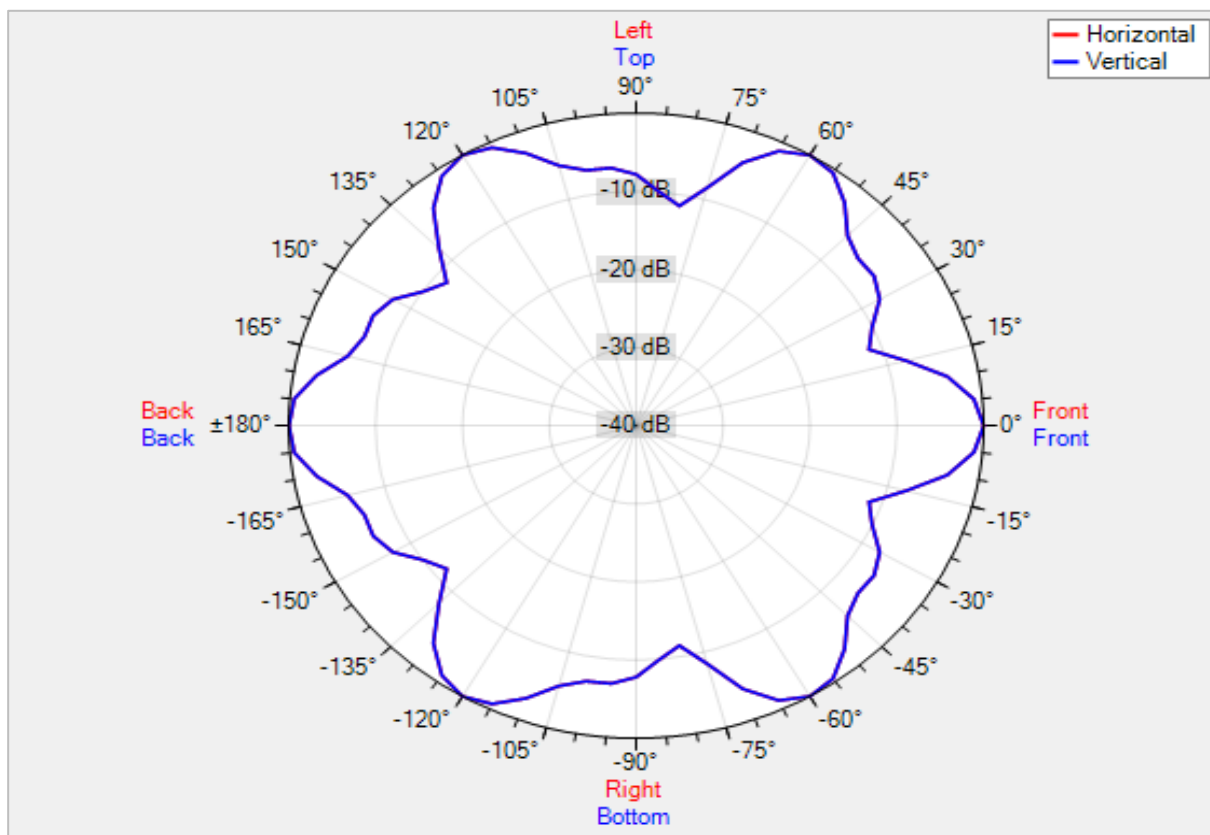

SmartSound-360 was developed and designed as a piece of art, able to blend into your surroundings, preserving your atmosphere while ensuring its sound and visual animation.

It is a real communication channel, you have the ability to custom its 2 sides according to your desires with a personalized message, an advertising insert ... Define your design and we print it on demand on a textile guaranteeing excellent acoustic transparency.
