

AD-4000

Voice Alarm system Amplifier

EN 54 - 16

Key points

- 2 000 Watts max. power
- Excellent efficiency > 90%
- Compact size / 1U in 19" rack
- Compliant EN54-16*

Class D technology
Excellent efficiency

Compact size / 1U
Space saving

500W modules
Multipurpose

More details

AD4-XXXX amplifiers are using the last numerical class D technology. It offers many advantages : huge power with 2000W maximum, excellent performances with an efficiency >90%, very good heat dissipation and space saving with its 1U size in 19" rack.

Power status / fault status / line status are displayed with LEDs on the front panel of the amplifier.

SPECIFICATION

Inputs	3 points terminal block connectors (sensitivity 0 dB / balanced)
Outputs	2 points terminal block connectors (voltage 100V)
Efficiency	> 90%
Frequency range	20 Hz – 20 KHz
Power supply	Mains : 110V-265V AC 50Hz/60Hz battery : 21,6V-30V DC
Dimensions	1U / for 19" racks (48,3 x 40 x 4,4 cm)
Material	Aluminum
Color	Black front panel

AD-4000 range	Power	Weight
AD4-2250	2 x 250W	3,7 kg
AD4-2500	2 x 500W	3,7 Kg
AD4-4250	4 x 250W	4,8 Kg
AD4-4500	4 x 500W	4,8 Kg

*Compliant with EN54-16 when used with our VA systems

AD-4000

Voice Alarm system Amplifier

Front panel detailed (example AD4-4500)

1 / 2 / 3 / 4 indicates available channels
and their status

LED name and color	If LED is on
Protect (red)	indicates that the corresponding channel has been put into protection
Clip (yellow)	Indicates a saturation of the signal on the amplifier output
Signal (blue)	lights up at the rate of the modulation present on the channel input according to the input level
ON (green)	Indicates that the corresponding channel is powered

Rear panel detailed (example AD4-4500)

* 24V powering is splitted in 2 separated inputs on the 4 channels version in order to limit input's amperage
