

-  **Programmable clock**
-  **Automatic time change**
-  **Memory card included**
-  **Backlit display**
-  **Easy Installation (DIN rail)**

The **RY-HOR2C** digital clock offers significant programming flexibility. It is possible to set up multiple programs (a basic program + 14 separate weekly programs such as a holiday program for example) including management of bank holidays in different countries. Astronomical switching functions such as automatic calculation of sunrise and sunset times are also available. The RY-HOR2C clock is therefore perfectly suitable for sound systems programming.

### Features

Types of program	Annual Astronomical
Frequency	50 – 60 Hz
Number of channels	2
External inputs	2 Push-buttons / Switches
Memory slots	800
Memory card	included
Supply voltage	100 – 240 VAC
Installation	DIN rail
Dimensions (wxhxd)	54 x 86 x 60 mm
Protection rating	IP20
Ambiant temperature	-30° to + 55° C
Material	Thermoplastic

### Applications

Comfort sound system .....

-  **Schools**
-  **Colleges**
-  **Institutes**
-  **Universities**
