2 built-in speakers  
Live broadcast of exchanges

Jack 3.5mm input  
Headphones connection

Microphone cell (cardioid)  
Ideal for conference system

Backlit sensitive button  
Easy speech activation

### More details

The CONF-PD delegate console uses a cardioid microphone cell (captures sounds coming from the front) suitable for a conference system.

It allows the delegate to freely speak or with 'president' validation depending on the mode chose on the central unit. It easily connects to the system thanks to its RJ45 input located on its bottom (below) and can be chained with another console thanks to its second RJ45 output port.

### FEATURES

Directivity	Cardioid
Bandwidth	20 Hz – 20kHz
Gooseneck	41 cm
Connectors	2 x RJ45 (IN / OUT for console chain) 3.5mm stereo headphone jack
