

Key points

- Wireless delegate console
- Autonomy = 20 hours
- Built-in speaker
- Sensitive keys + OLED screen
- Choice of listening language + voting function

More details

The CONF-PD-WIFI console is a wireless console using a cardioid microphone cell (captures sounds coming from the front) suitable for a conference system.

It allows the delegate to freely speak or with chairman validation depending on the mode chose on the central unit. It is possible to choose the listening language (a headset is then recommended) and to take part in votes.

Its OLED screen also displays various information such as the speaking time, battery level, wireless connection reception, date & hour...

It easily connects to the system thanks to its wireless connectivity and its autonomy goes up to 20 hours in use.

FEATURES

Directivity	Cardioid
Bandwidth	20 Hz – 20kHz
Gooseneck	41 cm
Connectors	3.5mm stereo headphone jack 3.5mm microphone jack
Frequency bandwidth	2.4GHz / 5GHz
Power	4900mA lithium battery
Base dimension	18,5 x 5 x 13 cm (L x h x l)
Color	Black
Material	ABS
Weight	1,1 kg (with gooseneck microphone)
Others	2m RJ45 cable supplied
