2 built-in speakers  
Live broadcast of exchanges

Jack 3.5mm input  
Headphones connection

Microphone cell (cardioid)  
Ideal for conference system

Backlit sensitive buttons  
Easy speech management

### More details

The CONF-PP chairman console uses a cardioid microphone cell (captures sounds coming from the front) suitable for a conference system.

It allows the chairman to speak and manage who can speak among delegates thanks to the integrated sensitive buttons (priority button and validation of request to speak button).

It easily connects to the system thanks to its RJ45 input located on its bottom (below) and can be chained with another console thanks to its second RJ45 output port.

### FEATURES
