Conference modes management
Open / Speech validation / Voice detection / FIFO

Volume management (0 dB to -20 dB)
Management of output volume

Max. number of active consoles
Limit the number of simultaneous broadcasts

Recording function
Record conference on USB key

More details

The CONF-UC central conference unit can be used to control a system of up to 90 consoles (CONF-PP / CONF-PD).
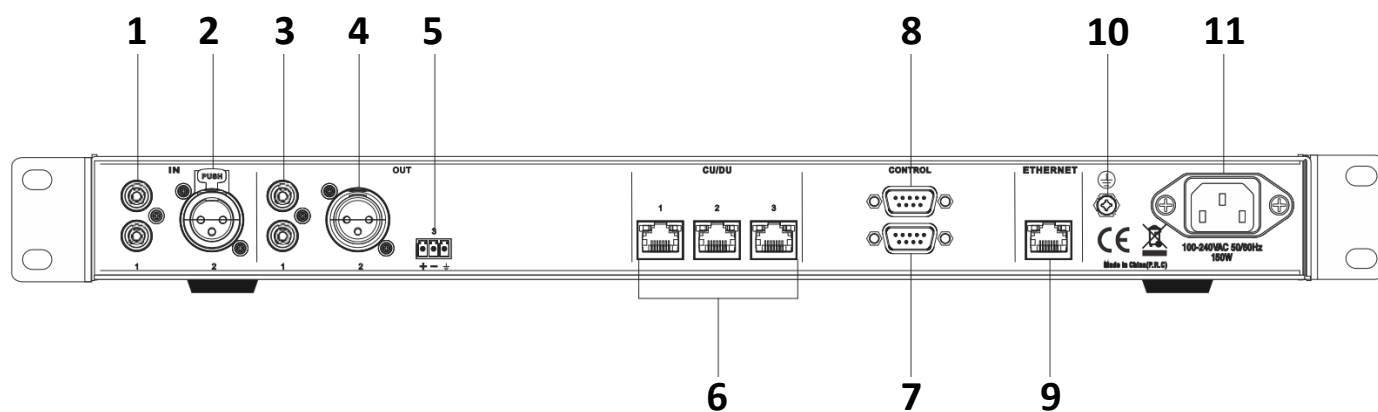

It is very easy to configure on the front panel by setting the conference mode, the maximum number of consoles that can be active simultaneously and the output volume if necessary.
It is also possible to record conference discussions on a USB key in MP3 format using the button on the front panel.

The central unit is easy to install in a 19'' rack thanks to its small footprint of 1U.

FEATURES	
Consoles capacity	90 consoles max. (5 200 max. via extension modules)
Bandwidth	20 Hz – 20kHz
Distortion	< 0,05%
Input	2 inputs (RCA female / XLR male) 3 outputs (RCA female / XLR male / Euroblock connector)
Power	110 - 265 VAC
Consumption	12W (150W max.)
