GXT-4000-XX

Made in France

🌀 **Touch interface**

🌀 **From 16 to 64 programmable keys**

🌀 **Audio Bus architecture**

🌀 **Easy and quick installation**

🌀 **Inconspicuous and multipurpose**

The **GXT-4000-XX** is a touchscreen call microphone console : from 16 to 64 programmable keys. Carefully studied by our engineers, it works on a bus architecture, ensuring RS485 communication, power supply distribution and share of a same audio channel.

Connection of consoles is therefore made from one console to the other one, without having to go through the central element. Provided with an electret microphone, a touchscreen, 1 memory card holder, 1 monitoring loudspeaker, 1 limp button with cap. This console meets all your needs in Public Address.

Either put on a table or flush-mounted, this console can be used in several application types.
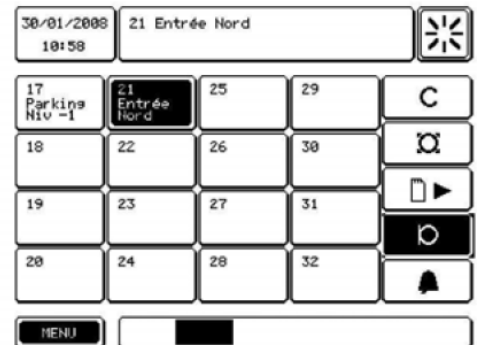

Features

|		
Message reader		SD cards
Series connection	Bus	RS 485
Power supply	24 VDC	Cons. : 110 mA max
Dimensions		287 x 237 x 73 mm
Color	Grey console	Black base
Material		Metal
Weight		2,5Kg
